TOGETHER, SENNHEISER AND XILICA ARE REIMAGINING THE COLLABORATION SPACE.

LEAVE THE CODE BEHIND

Getting great meetings shouldn't be a challenge. With pre-built integration between Sennheiser TeamConnect Ceiling 2 and Xilica room systems, all you have to do is tap the plugin. No code needed.

VOICELIFT SUPPORT

Xilica supports Sennheiser TruVoicelift technology, embedded in every TeamConnect Ceiling 2, to create targeted voice amplification and automatically reduce unwanted noise.

FOLLOW ME

Benefit from automated PTZ that ensures your camera follows speakers across the space as they move, with Xilica's PTZ camera-control functionality developed utilizing the Sennheiser TeamConnect Ceiling 2 beam angle.

MUTE-SYNC

Leave confusion behind with end-to-end mute status sync between Sennheiser TeamConnect Ceiling 2 and Xilica room systems. Changing mute status on your Xilica touch-control or UC software will sync throughout the chain and show on the TCC2's integrated LEDs.

XILICA®
